Periodic Table & Electron Configuration Worksheet

Use the periodic table and the steps below to determine the electron configuration of the elements below using noble gas notation

| Step # | Process | Example |
|--------|---|--|
| 1 | Find the element on the periodic table. | Iron(Fe) |
| 2 | Find the noble gas that comes before the element. | argon |
| 3 | Determine which period the element is in. | period 4 |
| 4 | Write the electron configuration using noble gas notation. Start with the noble gas in brackets and then list the energy subshells (make energy level and orbital block) that are filled up as you move to the right toward the element. Main Group (s) for the s-block and a block, n = period # for the d-block, n = period # - 1 and for the f-block, n = period # - 2 | $[Ar] 4s^2 3d^6$ |
| 5 | When you get to the block that the element is in, count how far the block the element is. This will be the number of electrons in the last subshell. | bromine is the 5 th element in the s-block, $[Ar] 4s^2 3d^5 4p^4$ |

| | | | |
|---------------|------------------|---------------|--------------------------|
| 1. Lithium | $[He] 2s^1$ | 9. Potassium | $[Ar] 4s^1$ |
| 2. Carbon | $[He] 2s^2 2p^2$ | 10. Titanium | $[Ar] 4s^2 3d^2$ |
| 3. Oxygen | $[He] 2s^2 2p^4$ | 11. Chromium | $[Ar] 4s^1 3d^5$ |
| 4. Neon | $[He] 2s^2 2p^6$ | 12. Van | $[Ar] 4s^2 3d^3$ |
| 5. Magnesium | $[Ne] 3s^2$ | 13. Nickel | $[Ar] 4s^2 3d^8$ |
| 6. Aluminum | $[Ne] 3s^2 3p^1$ | 14. Zinc | $[Ar] 4s^2 3d^{10}$ |
| 7. Phosphorus | $[Ne] 3s^2 3p^3$ | 15. Germanium | $[Ar] 4s^2 3d^{10} 4p^2$ |
| 8. Chlorine | $[Ne] 3s^2 3p^5$ | 16. Selenium | $[Ar] 4s^2 3d^{10} 4p^4$ |

Answer Key**Self-Evaluation Exam 3: Medical Medical Assistant Review 4c**

- (D) In this example, twenty-eight capsules of a 250-mg dose of cephalexin should be dispensed to the patient. The formula is the following: $28 \times 250 \text{ mg} = 7,000 \text{ mg}$, which is the same total amount as the original prescription (500 mg twice a day for seven days: $500 \times 2 \times 7 = 7,000 \text{ mg total}$).
- (C) Registered Mail is the most secure service offered by the post office. Registered Mail provides insurance coverage for valuable items and is controlled from the point of mailing to the point of delivery. This service should be reserved for mailing items of tangible value, such as gifts or items that cannot be replaced in case of loss or damage. First Class Mail and Priority Mail can be registered.
- (C) Denial is an unconscious defense mechanism in which a person avoids emotional conflict and anxiety by refusing to acknowledge thoughts, feelings, desires, or facts that are consciously unacceptable.
- (C) A speculum is used to examine the vagina. This instrument is a retractor used to separate the vaginal walls to allow for examination of internal structures.
- (E) Inflation, which is the hardening of the skin caused by inflammation (a reaction to the tuberculin protein derivative), indicates a positive result of a tuberculin test.
- (E) The spleen muscle is located in the leg.
- (E) Night blindness is caused by a deficiency in vitamin A. Vitamin B₁₂ deficiency may lead to Wernicke-Korsakoff syndrome. Hemorrhage can be a symptom of vitamin K deficiency. Pernicious anemia may be caused by vitamin B₁₂ deficiency.
- (C) A human neuron conducts nerve impulses toward the spinal cord and brain.
- (B) When using a modified-block letter style, begin all lines at the left margin, with the exception of the date line, complimentary closure, and typed signature, which usually begin at the center position.
- (C) Under the old classification system, Third-Class Mail included books and catalogues of twenty-five or fewer bound pages, manuscript copies, identification cards, circulars, and other printed materials, as well as all other matter weighing less than 16 ounces that was not sent First or Second Class.
- (E) Calls that require the attention of the physician include emergency calls, calls from other doctors and physicians, calls from patients who want to discuss test results (particularly abnormal results), calls from patients who want to discuss symptoms with the physician, reports from patients concerning unsatisfactory progress, requests for prescription renewals when they have not been previously authorized by the physician, and personal calls. In general, all emergencies should be passed to the physician immediately. Calls from other physicians should also be passed to the device immediately if possible.

Nel libro antico le guide e le sguardie, post a protezione delle prime pagine staminate o manoscritte del testo, contriscono a tenerlo insieme alla copertina con spaghi o fettucce passanti nelle cuciture al dorso; nel libro modern è invece la garza che unisce i fascicoli alla copertina. Le tavolette di cera erano assicelle di legno ricoperte da uno strato abbastanza spesso di cera che veniva incisa da uno stilo. Antichità When i sistemi di scrittura vennero inventati, furono utilizzati quei materiali che permettevano
